

Clinician Notifier Competency Checklist

Name (print): _____ Unit: _____ Date: _____

- ___ Demonstrate how to **Log in** to Clinician Notifier and **Assign** your patients.

- ___ From the **Patient List**, highlight a patient and review their **Realtime** waveforms. How many seconds of waveform data can be visualized on the screen?

- ___ Demonstrate how to increase the size of the waveform; now change the lead you are viewing.

- ___ From the **Patient List** demonstrate how to review a patient's **Alarm History**. How many alarms can be stored in the **History** for a patient? Now select an alarm and view its **Details**.

- ___ Demonstrate how to view **Recent Alarms** by tapping on the icon at the bottom of the screen.

- ___ True or False. If a patient is in an alarm state and **Suspend** is selected, all alarms to the device are suspended for 90 seconds.

- ___ Discuss the difference between Primary, Secondary, and Broadcast alarm notification.

- ___ Demonstrate how to **Log out** of Clinician Notifier and turn off the device.
